THE MOVEMENT OF ORE TO THE BLAST FURNACE. [1961] [24]p.
Order from SLA $2.60 61-16557

Trans. of a [Paper from] Conference on Works Transport [held at] Düsseldorf, 16-18 Oct 56.

DESCRIPTORS: Blast furnaces, *Ores, *Transportation, Railroads, Shipping, Costs, *Steel industry.

The process of moving ore varies considerably from works to works. The geographical position of the works exerts the greatest influence. The older works lie mainly in enclosed urban districts; streets, railways and inhabited districts determine the layout of the works rail system. Unsuitable layouts can result in increased shunting and additional costs. The varying positions of the individual sections of the works in relation to each other, together with the unequal technical efficiency of (Machinery--Transport, TT, v. 6, no. 6) (over)
